Professional Experience:

Flagstar Bank / Corporate 7/2017 – 8/2018

UI and UX Designer / Web Content Author

- Designed and Developed Web Pages using AEM.
- Authored Content and played a Major Role in the merger of Flagstar Bank and Desert Community Bank which I was responsible for creating the new Desert Community Bank website to match Flagstar's styling and Layout.
- My Responsibilities as a UX Designer was to get feedback from Users in the Testing and Development Stage as well as researching what age group uses Online Banking, Mobile Banking etc. Validating the Site Internally and Testing Externally.
- Usability Testing was one of my Primary duties as well. This included; testing the Website for errors, testing for responsive pages and testing for Mobile and Tablet Compatibility.
- Played a Key Role in developing the UI and Wireframes for the Desert Community Bank App

BOSCH / Ford Motor Company 7/2015 – 5/2017

Sr. UI/UX Designer / Mobile Designer / Course Designer

- Designed and Developed eLearning content using Adobe CC Software for Ford Vehicles used by Technicians in multiple markets and dealerships all across the globe.
- Developed and Designed UI / UX Elements for Mobile and Tablet based Web Apps as well as converting Flash based content into HTML5 for Responsive content and Mobile compatibility.
- Heavily Utilized Google Analytics when using the New and Responsive Website and Mobile Website. I was responsible for accessing Google Analytics and coming up with strategies to reach out to more users. My primary focus was Comparing Data Ranges, Deep Geographic Data, Local Conversion Data, Funnel Visualization, Navigation Summaries, Customize Dashboards, Creating Email Reports, Keyword Sourcing, Referring Sites, Browser Capabilities, Data Speeds, SEO Traffic, Top Content, Top Exit Pages and Developing Campaigns and Goals.
- Head of eLearning Course Development and Design and was responsible for Translating English course content into different Languages, which included adding Recorded Voice Over for CC Text on each eLearning course and created Exams and Scenario Tests for all Courses. HTML5 / CSS3 and ASP.NET were utilized in the creation of each Online Course.
- Created and Built Wireframe Models for Mobile Design Projects and Applications. Responsible for Hand Drawing and Implementing Wireframes into Design Software to create
- Developed Software for Ford that allows Voiceover Scripts to be exported for Translation using C# in Visual Studio 2015. CSS and SASS were used using the Sassy Studio Extension for VS and my other responsibility was designing UI Elements for the Software.
- Worked together with Bosch and Ford Programmers to Develop Software that would allow Uploading finished courses directly to the Development Server for Testing and Debugging.

Self Employed / Freelance Developer 5/2013 – 7/2015

Web Developer / Graphic Designer / SEO Specialist

- Design and Develop Websites, SQL or MySQL Databases, Cloud based Services and Content Management Systems (WordPress, Joomla and DotNetNuke) for Clients.
- Programmed and designed over 25 Websites for many different businesses Large and Small.
- Creating logos, marketing related materials and interactive presentations (Touch and Non-Touch).
- Developing Responsive and Adaptive Websites for use in Tablet, Smartphones, Desktop and Laptop Hardware by using User Agent Detection and CSS Media Queries.
- Utilize SEO Optimization and Webmaster Tools for Google, Bing and Yahoo Search Engines.
- Building Mobile Web Sites for Businesses and Other Freelance Artists.
- Utilized Multiple JavaScript Frameworks; including Angular.JS, Backbone.JS, React.JS and Node.JS web-based applications if needed for development.
- React.JS was my recommended JavaScript UI Framework of choice for developing important customer-facing pages where I needed to create a great user-experience with good design and exceptional response.

United Manufacturers Staffing, LLC. 1/2012 – 5/2013

Creative Media Director / Lead Development and Design

- Created the entire online identity and network infrastructure for the company.
- Created and designed the company web site in Flash as well as letterheads, business cards, company logo, and promotional materials used in marketing.
- Responsible for creating and implementing an open source web-based CMS and CRM compatible for both desktop and mobile device access.
- Setup and Configured PHP contact forms, MySQL databases and a Webmail System.
- Programmed ActionScript Code for parsing Data from XML Files using [CDATA].

PERSONA Enterprises Inc. 8/2010 – 1/2012

Lead Web Developer / Graphic Designer / Marketing Supervisor

- Responsible for Designing and Coding Websites for the company as well as third party clients.
- Created a 30-page magazine from scratch entitled GotSpots using Adobe InDesign, which contains career help and information articles.
- In charge of designing logos, business cards, workflow charts, pamphlets, brochures, and many other different types of marketing materials.
- Implement and develop ASP scripts for in-house CRM software called RocketPack as well as configuring Microsoft SQL Databases and ASP.NET Websites.
- Successfully created 8 different company websites from scratch, including TeknicalTG.com, PersonaHR.com, CompanyRocket.com, PersonaMaintenance.com, MaintenanceMechanic.com, gotSpotsMagazine.com, StressOPedic.com and utu-mtatrustfund.com.

Pixel Touch Inc. 5/2008 – 8/2010

Web and Graphic Designer / UI Design / e-Commerce

- My first task was to create the company's Online Identity, Website, Product and Client Database, as well as Flash based ADs for use in Digital Signage Advertising.
- Worked side by side with project engineers in the process of creating and modifying Touch Screen Applications, which included; User Interface Menus, Icon Images, Digital Media Servers and the company's web-based CRM.
- Responsible for handling Customer and Vendor Technical Service and Sales, which were mostly Business-to-Business Sales and Service.
